

Adding Networked Printers X.4

- Open a document you would like to print
- Select Print from the File Menu
- Select Add Printer form the Printer drop down menu
- The Print Browser Window will appear

- Even though you may see your printer under Printer Name, you will experience less trouble if you click More Printers in the bottom of the window
- The Print Browser will appear

- Select AppleTalk and AppleTalk Network from the Print Browser drop down menus
- Locate the printer's Zone and click Choose

- A list of printers in the specified Zone will appear
- Choose the desired printer, click Add
- Finally, choose the Printer from the Printer drop down menu and click print
